

FAA Make/Model Directory for SLSA - March 3, 2020

FOR INFORMATIONAL PURPOSES ONLY

(Ref. FAA Order 8130.2J, Chapter 9, Section 9-2, Par. c.)

This document provides a listing of all known special light-sport aircraft (SLSA) make/model combinations that have received, or may be eligible to receive, SLSA airworthiness certificates. If a make/model combination does not appear on this list, AIR-6D2 must be contacted prior to issuing the first airworthiness certificate. FAA Order 8130.2J, paragraph 9-2.c. states in part, "Contact AIR-143 (now AIR-6D2) before issuing the first airworthiness certificate to any new make or model LSA."

Send notification of a new make/model to robert.franklin@faa.gov (AIR-6D2).

DARs cannot issue the first special LSA category airworthiness certificate for any new manufacturer's LSA or to a new model from existing manufacturers. Only an assigned ASI can perform the first issuance.

The information in this directory is based mainly on a search of the FAA Registry and is considered current as of the revision date identified on the document. Review of the FAA Registry for update of this information will be performed approximately every six months. New make/model combinations will be added after the issuance of the first SLSA airworthiness certificate for that make/model. Other updates will be made when deemed appropriate.

Contact Terry Chasteen, AIR-694 with any questions or comments in regard to this listing or for any corrections that need to be made: Call 816-329-4147 or submit an e-mail to 9-AIR-ACE-SAD-LSA-SAFETY@faa.gov.

Detailed information provided for each make/model is not necessarily comprehensive. Refer to the applicable aircraft documentation for complete information on the specific make/model.

No.	Make	Model / Series	Engine Options (if applicable)	Propeller Options (if applicable)	Wing/Canopy Options (if applicable)	Type	Manufacturer	PSP
	Name assigned to the aircraft by the aircraft manufacturer when each aircraft was produced. Name on FAA registry may be same or similar name. In some cases, where multiple "make" names have been used they are shown in this column.	Aircraft manufacturer's designation for an aircraft grouping with similar design or style of structure. Name on FAA registry may be same or similar name. Includes model variants (e.g., "Series") and market names, as applicable. See NOTE 1 at end of listing.	Known engine installation options for this make/model. Refer to the AOI/POH for specific approval.	Known propeller (Mfr) installation options for this make/model. Refer to the AOI/POH for specific approval.	Known wing / canopy options for this make/model. Refer to the AOI/POH for specific approval. (Applicable only to weight-shift-control (trikes) and powered parachutes)	Abbreviation for class of aircraft. See NOTE 2 at end of listing.	The FAA considers an SLSA manufacturer to be a person who not only can attest to meeting the provisions of 14 CFR 21.190, but who can demonstrate these abilities to the satisfaction of the FAA. A person who cannot demonstrate these abilities, or complete the manufacturer's Statement of Compliance would not be considered a manufacturer.	"X" indicates the mfr. has signed a Partnership for Safety Plan (PSP) with the FAA.

<p>NOTE 1: For purposes of this directory this column may indicate the "Model" designation and/or a variant designation (e.g., "Series") as determined by the manufacturer [Ref. ASTM F2626 & F2930]. A variant designation may be used in this directory to differentiate the engine and propeller options available to that specific variant from other variants of the "Model." [Ref. CAST/ICAO Common Taxonomy Team (CICTT) document on International Standard for Aircraft Make, Model, and Series Groupings]</p> <p>Use of a "Series" designation in this directory does not constitute a new "Model" designation for the purposes of determination of first make/model airworthiness certification for which AIR-6D2 must be contacted and where only an ASI, not a DAR, may perform the airworthiness certification. A new "Series" may be added to this table without being considered a new "Model." Any policy/guidance issues on "Model" designation as related to airworthiness certification should be referred to AIR-6C3 for determination of proper action.</p>
